

CaPoly

The replica of the disputed Cal Poly logo, displayed on the Fall Conference program.

Poly logo still a mystery subject

by Mary Hennessy
Assistant Managing Editor

Even though a logo appeared on the fall conference schedules distributed to faculty at the beginning of fall quarter and even though that logo is the one that President Baker selected, public affairs officials insist Cal Poly remains logoless.

Baker selected a larger version of the one-inch replica printed on the schedules to portray Cal Poly's learn-by-doing policy and the university's technical and agricultural aspects. But Public Affairs director Stan Bernstein, who for two years has been leading the search for the logo, said it was only printed on the schedules in search of a response and it was not official.

"Nobody knew what it was," he said. "We were thinking, you know, that maybe somebody would question who did it."

Bernstein said the logo, designed by Graphic Arts

instructor Patrick Munroe, might be unusable on the Cal Poly letterhead because it consists of three colors and the state printers can only print two.

"The critical thing is whether it can go on the letter head," Bernstein said. "It has not been said what will happen if it doesn't."

The search for a Cal Poly logo began last year when Bernstein selected a design from ideas submitted by instructors in the audio-visual department. The logo was approved and prepared for the state printing office.

But the design, at the request of Jon Erickson, dean of the school of Communicative Arts and Humanities, was presented to a group of instructors from the Art department. The group called the design too "corporate" for the Cal Poly image. Bernstein then solicited designs from other departments.

Eventually, and after those who submitted designs complained of disorganization and lack of communication, Munroe's was chosen.

Starting the CAR for winter

by Gail Pellerin
Outdoors Editor

With school in full swing and most students securely entrenched in their fall schedules, it may be hard to believe that registration for winter quarter is right around the corner.

It isn't panic time yet. According to the university registrar's office, Computer Assisted Registration procedures for winter should not be plagued with the complications that affected CAR this fall.

Battles over the state budget kept California State University fees in limbo until trustees of the university were able to set fees on July 25. The new fees of \$239 represented almost a 25 percent increase over the Spring 1983 fees.

The delay in setting the fees left students little time to meet the August 3 payment deadline, said Cheri Baxley, secretary to the registrar. Late registration processing and fee deadlines were put off until August 26.

But with the budget battle over, registration procedures are back to normal and Baxley warned that students should get their CAR forms in on time.

"It was flexible this time (for fall) because the fees were announced so late," Baxley said. "Next quarter it won't be so flexible."

Despite the fact that instructions and answers to questions are readily available to students who commit themselves to reading the quarterly class schedule, students continually make mistakes on their CAR forms, according to University Cashier personnel.

One of the biggest problems with CAR is that students don't fill out their checks properly, said Stan Rosenfield, supervisor of collections and disbursements. Some checks have the wrong amount written in while others are simply not written correctly. Another problem occurs when the check is sent separately from the CAR form.

Expanding bookstore line includes computer section

by Mark Brown
Managing Editor

A complete computer section will be the next addition to the ever-expanding line of products available at the El Corral Bookstore, said the store's operations manager.

"We're going to be expanding that department tremendously," said Court Warren. "We're going to be putting in a whole new department."

Currently the store features few items in the way of computers, he said. The main items are the Commodore 64 personal computers. The new additions will include more computers, software, computer furniture, and supplies.

"We're constantly doing new things," Warren noted. "We create things, get them going, and go on to something else."

But standing in the way of future expansion of the store is the lack of space.

"The store was designed for a population of 9,000 students," Warren explained, noting that the Cal Poly population now exceeds 15,000.

"It's obvious to everyone that we are quickly outgrowing the facility," he said. "But we're no different from food

services or other departments."

"If someone said that the student population would never exceed 15,000, we'd probably survive quite nicely," Warren continued. "But if we do not plan in the long run to expand our facility in concert with enrollment, we will face a crisis if we're going to offer the service level we do now."

While space is growing short, the store has plenty of staff to accommodate the students' needs, Warren said. The store's full-time staff of 26 hasn't grown in at least seven years, but the number of part-time student workers fluctuates to accommodate the peak periods. The store has a normal staff of 80 part-timers, which can swell to 140 during peak periods.

This student staff takes care of most of the stocking and warehousing tasks in addition to cashiering, accounting and secretarial duties.

Warren emphasized that the main goal of the store's expansion is to provide better service.

"The bookstore staff is always open to suggestions for improvement and for additional services," he said. "Our only purpose for being here is to serve the needs of the students."

The new music band X. (From left) John Doe, Billy Zoom, Exene Cervenka, and D.J. Bonebrake.

'X' to play at Cal Poly

A dance concert featuring the critically-acclaimed, highly danceable new music band X will take place on Monday at 9 p.m. in the Cal Poly Main Gym.

A refreshing feature of the concert will be its very affordable ticket prices, said Jim Parker, ASI concert committee chairman. Prices run as low as \$4.75 for advance student tickets to a high of \$6.75 for day-of-the-show general public admission. This price is about \$3 per ticket lower than a comparable concert last year which featured the Blasters, Parker said.

"I think it'll do well," he said. "X still

seems to be on the upswing." Besides poor publicity, the Blasters suffered from poor timing and high prices, obstacles which the X concert doesn't face, Parker said.

Opening for X will be The Red Devils, an L.A. based rockabilly band which also opened the Blasters concert.

"They're a good band," Parker said. "They're going to be a good part of the show."

So far only about 600 tickets for the show have sold, far short of the 1,700 ticket break-even point, Parker noted. However, he said, he's confident sales will pick up as publicity gets rolling.

A Bad Reputation

College students have a bad reputation.

Think about the typical college student as portrayed on TV and in the movies and what do you get? John Belushi belching. John Belushi guzzling a bottle of whiskey. John Belushi screaming "Food fight!"

The female media stereotype of the college student: a buxom, nubile cheerleader who attends fraternity parties and giggles a lot. The male media stereotype: a hard-drinking Neanderthal, quick of fist and loud of mouth; a hard-drinking, Porsche-driving, Vuarnet-covered snob; or a calculator carrying, ice-cold science major.

That's what the public is usually shown as examples of college students. But where do these images come from? Do we really deserve all that bad press?

Unfortunately, the answer may be yes. With the exception of the calculator-carrier, none of the above stereotypical students would be pleasant as next-door neighbors.

Students in this town can be extremely insensitive to their neighbors and the community at large. And just a few insensitive students can make life miserable for anyone who has to live near them.

You may love it when your favorite song comes on the radio, but you don't have to crank the volume up enough to simulate earthquake conditions while living in an apartment with walls constructed of plaster and a prayer.

You may feel great after a Thursday night at the Grad, but you don't have to walk through your housing complex singing or yahoing at midnight—or relieving yourself in your neighbor's bushes if you're really bad off.

You may feel it's exciting to be up at 11:30 p.m. as part of a sorority outing, but you don't have to have a group conversation in the condo parking lot loud enough to carry the entire length of a football field about the success of your most recent exchange.

There are a lot of students at Cal Poly who realize that most people like to sleep at night and that a reasonable amount of quiet is a prerequisite for studying. But there are a few out there who are spoiling the living environment for the rest of us, and perpetuating the student stereotype in the eyes of the community.

THE FED IS RESPONSIBLE FOR HIGH INTEREST RATES!

As the new quarter and year begin at Cal Poly, we'd like to urge students to think about their neighbors. Applying the "Golden Rule" never hurts: If you wouldn't want to be blasted out of bed late at night by your neighbor's favorite song or friendly mid-week Quarters game, think about it the next time you reach for that volume knob.

The Last Word: A bitter CHiPs experience

The law finally caught up with me.

I had had a lousy Friday at work and was on my way to San Jose for a weekend excursion. I was tired. I wasn't paying attention. Suddenly, the car behind me flashed its lights. I obligingly moved over one lane, but the lights were still on. Then the red light came on.

"Me?" I said aloud, alone in the car. Maybe it was a stupid reaction, but I couldn't believe it. Me, the one who'd never even gotten a parking ticket?

I pulled off onto an exit, convinced that things couldn't get any worse that night. A young CHP officer got out of a hotshot Mustang and asked me to roll down the window.

"Good Evening. Do you have any idea why I stopped you this evening?" he asked, blinding me with a flashlight. He was cheerful to the point of being sadistic.

"Nooo; was I going too fast?" I answered with big innocent eyes. I was thinking of the time a girlfriend and I got out of a ticket back in high school. We were wearing our cheerleading outfits and we told the police officer, "Gee, we didn't mean to speed, but we're late for the game, officer!" and he'd given us a big smile and said, "Well, I'll let you two go this time, but no more speeding. I'd hate to take two young ladies as pretty as you to the hospital after an accident."

But big eyes and the innocent act didn't stop this Chippie; he told me I was going 68 "at my peak" and slowed down to 62 mph going uphill. I figured out later that he had to have been following me for at least 20 minutes. He told me he was going to "help me out" by writing me up for "only" 65 m.p.h.

Innocent until the end, I said "thank you" after he gave me the ticket. I was hoping to make him feel guilty for picking on a sweet young girl like me while there were criminals on the loose, but I don't think it worked.

I was a basket case for the rest of the weekend. I had never seriously believed the CHP would actually bother to write a ticket for any speed below 70; 65 used to be the speed limit, for goodness sakes. Now 80, 90, I could understand, but a piddley 65?

So I obeyed the 55 mph speed limit for the entire weekend (I have since begun to drive like a suburban mother hauling a Brownie troop.) I watched with envy as Porsches, Mustangs, and even beat-up '69 Toyotas sped past me on the very stretch where I'd been ticketed. I was out for revenge. Where was the CHP when these people breezed by? I wanted to see one of them, just one of them, pulled over by the side of the highway in front of a CHP Mustang.

I haven't seen a CHP since.

But I have gained new respect for people who observe the speed limit on the highway. Before, I considered them brain-damaged geriatrics or terminal "creepers" out to annoy other drivers. Now I think that they're all the other people who've gotten speeding tickets.

Daily policy

Letters and press releases may be submitted to the Mustang Daily by bringing them to the Daily office in Room 226 of the Graphic Arts Building, or by sending them to: Editor, Mustang Daily, GrC 226, Cal Poly, San Luis Obispo, CA 93407. Letters must be double-space typed and include the writers' signature and phone numbers.

Editors reserve the right to edit letters for length and style, and to omit libelous statements. Letters should be kept as short as possible.

The Mustang Daily encourages readers' opinions, criticisms and com-

ments on news stories, letters and editorials. To ensure that letters will be considered for the next edition, they should be submitted to the Daily office by 10 a.m.

Press releases should be submitted to the Daily at least a week before they should be run. All releases must include phone numbers and names of the people or organizations involved, in case further information is needed.

Unsigned editorials reflect the viewpoint of the majority of the Mustang Daily Editorial Board.

From the World...

MANILA, Philippines—The bloodiest anti-government rioting in President Ferdinand E. Marcos' 18-year rule rocked Manila Wednesday, leaving at least seven people dead and 150 injured by official count.

The violence exploded after a peaceful demonstration by about 500,000 Filipinos in front of Manila's main post office exactly one month after the assassination of Marcos' chief political opponent, Benigno Aquino.

WAKKANAI, Japan—United States searchers may have located "crucial portions" of the downed South Korean airliner, a Japanese official said Wednesday.

But the fleet of Soviet vessels continued to dominate the search near the crash site in the Sea of Japan. Pentagon officials in Wahsington said the Navy salvage tug Narragansett twice picked up and lost the pinging signal emitted by the plane's flight data recorders which are carried in the tail of the aircraft. But Pentagon duty officers said they had no information about U.S. vessels locating crucial wreckage.

BEIRUT, Lebanon—Druse and Palestinian militiamen launched a new attack Wednesday in an attempt to drive the Lebanese army out of the key moun-

tain town of Souk el-Gharb.

But by nightfall, the army and its tiny, aging air force had repulsed the assault, government radio reported. President Reagan last week authorized U.S. Navy ships to fire in support of the U.S. Marines and other troops in the national peacekeeping force and also in support of the Lebanese army when a threat to it also constituted a threat to the Marines.

The order underlined the importance placed by the Reagan administration on the defense of Souk el-Gharb.

From the Nation...

WASHINGTON—Secretary of State George Shultz told Congress Wednesday that the United States plans no wider role in Lebanon and urged quick passage of legislation authorizing 1200 Marines to remain there for 18 additional months.

"What we are doing in Lebanon is right," Shultz said. He added that it would be wrong to "turn tail and run" by withdrawing the Marines from the multinational peacekeeping force.

WASHINGTON—Interior Secretary James Watt, upset at a Senate vote barring him from leasing any more federal land for coal mining, told a business group Wednesday that he's being advised on the issue by "every kind of mixture...I have a black, I have a woman, two Jews and a cripple."

The remark drew laughter in the speech to the U.S. Chamber of Commerce, but Watt later issued a statement saying, "My choice of words today about the coal leasing commission was unfortunate and I have apologized to the one member of the commission who is handicapped."

Richard Gordon, a professor of minerals economics at Pennsylvania State University, is Jewish and has a paralyzed arm. He said that Watt seemed sincere in his apology to him but that he was still upset by the entire episode.

KNOXVILLE, Tenn.—A state appeals court Wednesday ordered immediate medical treatment for a preacher's 12-year-old daughter who suffers from deadly bone cancer, despite her father's claim that the family's religion forbids the use of medicine.

ACQUIRE A UNIQUE PERSPECTIVE AT LITTON DATA SYSTEMS

If you'd like to begin your computer engineering career with a company that looks at everything from all angles and explores even the most remote possibilities, come to Litton Data Systems.

Ever since computer technology was recognized as a vital part of military operations, Litton Data Systems has been searching for new ways to meet the challenging needs of our nation's defense systems. We are dedicated to continuous research and development in the application of modern software and circuit technologies to command, control and communications (c3) systems that provide greater performance reliability, maintainability and cost efficiency.

As one of the largest divisions of Litton Industries' international family, we can get your software or hardware engineering career off to a great start with opportunities in a variety of programs. This diversity offers continuous possibilities for challenge and advancement within the company.

Our salaries are excellent and our benefits package includes health, dental and life insurance, recreational programs and educational reimbursement. You'll also find our Southern California location very appealing.

If you would like to be a part of a company that's never satisfied with things as they are, join Litton Data Systems and acquire our unique perspective.

"Parents Welcomed"

Happiness makes for a bland new rock album

by Mark Brown
Managing Editor

Graham Parker has a nice wife, a nice home, and is very happy. While this might be good news for Graham, it's not for his fans. His music, once equalled only by Costello for scathing insight, now sounds like it was written by...well, a man with a nice wife, nice home, etc.

There's nothing wrong with happiness, and Parker, with his tumultuous musical career, deserves it as much as anyone. But his music was so good when he was angry...couldn't he suffer just a little more?

While his new album, *The Real Macaw*, retains the lyrical intensity of his earlier work, the music is soft and at times just plain mushy. Pretty. Commercial. Top 40. All right, I'll say it—"Miracle a Minute" could just as easily been written by Barry Manilow. OK?

It's hard to watch Parker take such a lunging stab at commercial success after the quality of his last three albums, two of which were undeniably

brilliant, the third better than most music on vinyl.

Squeezing Out Sparks, his 1979 masterpiece, was equalled only by 1980's criminally-underrated *The Up Escalator*. Both albums were lyrically biting, almost vicious, with appropriately scathing accompaniment by The Rumour, Parker's ex-band. Cuts like "Discovering Japan," "Passion is No Ordinary Word," "Empty Lives," and "Endless Night" each has enough intensity for an entire album, every song capable of exhausting the listener.

Last year's offering, *Another Grey Area*, marked Parker's move towards commercial success. The Rumour was gone, but Brinsley Schwartz from the band remained, and the energy level was maintained by driving cuts like "No More Excuses" and "Big Fat Zero."

The Real Macaw has no such cuts. Granted, Parker's lyrics are still strong—"Just Like A Man" and "You Can't Take Love For Granted" are biting and accurate enough to make any male cringe. "Beyond A Joke," while heavily Costello-influenced, is musically sound, as is "Passive Resistance." Unfortunately, everything else falls just on the wrong side of the wimpy border.

But the lyrics? Intense? Just listen:

Everybody's scene-stealing
It's always the same old number
They never let you out of school.
Well, I've got a gun that's loaded
I wanna hurt some fool.

Nothing hurts me any longer,
There isn't any room for pain

I'll pull the trigger back
As the volume gets stronger
And it sound like chains.

The problem is that the words just sound out of context with the slick backing and production that plagues this record.

This album will still be one of the best of the year, of course—after all, Hall and Oates, Toto and Loverboy are still around—but after seeing and hearing what Graham Parker can do, you can't help but feel some disappointment. Half of his appeal is in his lyrics, with the other half lying in the intensity of his delivery. That intensity is absent here, and that's a shame.

Join Kaptain Killowatt's campaign to stop energy waste by becoming a P.G. & E. Energy Conservation Intern in your Fraternity or Sorority.

By taking an active role in your house, you can help them win up to \$800 in cash prizes. Bar-b-ques, plant tours, drawings, and give-aways, plus info. on home conservation are all part of the Six-Month Energy Conservation Contest.

If you are interested in the position, talk to your house manager, president, or call your P.G. & E. Campus Reps. — Wendy or Mindy. 544-5228.

X takes defiant stand; makes room for listeners

by Robert Chancey
Special to the Daily

X, the greatest Los Angeles rock band since the Doors, has always occupied an unenviable position. Coloring harsh, jarring music with dissonant, poetic lyrics. Singer Exene and bassist John Doe, partners in rhyme, have spoken to a generation that doesn't want to listen.

Their instincts are purely populist, but their stance is defiant. Listeners are welcome in their domain, but are forced to absorb the cruel realities of their (our) world. Listeners aren't "on the bus or off the bus"; they must get on the damn bus.

On their fourth album, *More Fun in the New World*, X is finding room for more and more people on the bus.

Musically, they jump from brash rock and roll ("Make the Music Go Bang"), to a Bo Diddley stomp ("Poor Girl"), to a funk stutter ("True Love Pt. #2") and finally to radiant folk strains ("I Must Not Think Bad Thoughts").

X's songs don't just move, they wallop, thanks to drummer D. J. Bonebrake's glorious, non-stop assault on the drum kit and guitarist Billy Zoom, who mixes sophisticated chording with the appropriate dose of garage-band raunch.

Their subject matter has extended, but the location of most of the action hasn't changed. Their characters still populate the desolate, debilitating areas of Los Angeles—people fallen like angels of a sun-baked city condemned to Hell.

But Exene and Doe also see the big picture. They evoke a harrowing version of America in the 1980's.

"I Must Not Think Bad Thoughts," the album's centerpiece, is a rock and roll milestone. Building from gentle acoustic and plucking to a tense, smashing crescendo, the tune displays the tradition of murder this country has embraced since the 17th century.

"Bad Thoughts" also deals with massacre in the present. "Both sides are right, but both sides murder/I give up; why can't they?" Doe and Exene intone, revealing the tired voice of a generation conceived, nurtured and desensitized as by products of The New Industrial State.

X's music always goes bang and leaves listeners breathless, but "More Fun in the New World" is also the finest, most accurate account of the battered American condition since Bruce Springsteen's *Nebraska*. At that, it's an essential record.

Husband and wife songwriting team Exene Cervenka and John Doe front X during a recent concert at the Roxy.

Poly takin' it to the air

By David Kraft
Staff Writer

It may not be known as Air Coryell, or even Air Sanderson, but San Diego Chargers head coach Don Coryell would love the direction second-year mentor Jim Sanderson is taking his Cal Poly squad.

In fine Charger style, the Mustangs have taken the ball upstairs, and so far the results of the aerial offensive have been nothing to get down about. Cal Poly takes a 2-0 record into Saturday afternoon's contest against San Francisco State in the city by the bay. Kickoff is at 1 p.m.

Rest assured that the Mustangs are not an aerial circus a la San Diego or

Stanford, but the current corral at Cal Poly is a far cry from the '82 version, which eeked out a paltry 139 yards per game passing.

Sanderson points to a pair of key reasons for the turnaround: stability at quarterback with Tim Snodgrass and some talented receivers for Snodgrass to hook up with.

"We're throwing the ball a lot more," said Sanderson, "and it relates to confidence in the quarterback. Snodgrass creates stability within the team. It's important in terms of leadership, often silent leadership. He's also very intelligent. We feel really strong about him."

Snodgrass, a 6-2, 190 lb. senior who was a walk-on last season and inherited

McFarland named to head Poly nine

The Cal Poly athletic department didn't stray too far in finding a replacement for Berdy Harr, who recently stepped down after 11 seasons at the helm of the Mustangs' baseball team.

Steve McFarland, who has been involved with the Mustangs in various capacities since his playing days in 1971, was tabbed as the new head baseball coach by Poly athletic director Dick Heaton, effective immediately.

Heaton also announced the filling of two other voids in the department, naming Tim Rivera to lead the women's gymnastics program and Jill Orrock as the new women's basketball assistant coach. Both Rivera and Orrock will also immediately begin their new duties.

During his two-year playing career with the Mustangs (1971-72), McFarland roamed the left side of the infield at shortstop, being named to the all-conference first team both seasons.

After receiving his B.S. degree in physical education from Poly in 1973, McFarland began assisting Harr. He has also been head coach of the semi-pro Santa Maria Indians for eight years, leading the team to the National Baseball Congress national championship in 1982. Following that season he was named the NBC coach-of-the-year.

Rivera, 27, inherits the gymnastic job from Dr. Andy Proctor. Rivera comes to Poly via Cal State Chico, where he served as assistant women's gymnastics coach since 1979.

Orrock is also no stranger to the green and gold of the Mustangs, having played basketball two seasons (1976-78) for Poly.

Now close to finishing work on her master's in physical education, Orrock received her B.S. degree in 1979 from Cal Poly. Most recently she was head girl's basketball coach at Arroyo Grande High School.

Fall math review course offered for Poly students

by Andy Frokjer
Staff Writer

Students who did not pass the Entry Level Mathematics Examination can strengthen their math knowledge and skills by enrolling in an ELM course offered by the Cal Poly Extended Education Office.

The non-credit course, taught by mathematics professors Dr. Neal Townsend and Dr. Sabah Al-Hadad, is a review of arithmetic, plane geometry and elementary algebra.

Math E099 is offered in two sections: Monday-Wednesday-Friday from 7 to 8 a.m. and Tuesday-Thursday from 4 to 5:30 p.m. A tutoring lab is also available to ELM enrollees. The course will run the entire quarter, though students do not have to complete the whole course.

Beginning fall quarter 1983, all undergraduate students entering C.S.U. schools were required to complete the ELM requirement during their first two quarters of enrollment.

Students must pass the ELM-Exam or an equivalent test before they will be allowed to enroll in math classes, said Howard Vollmer, acting director of Extended Education.

Vollmer said that a recent statewide survey indicated that 33 to 38 percent of the students who took the exam did not pass it.

Students can enroll in Math E099 at the Extended Education Office. There is a \$60 fee for the course.

The next ELM exam will be given on October 22. Registration forms are available at the Admissions Office and must be turned in at the Testing Center in Jespersen Hall by October 7.

IN A BEER. AND LESS.**

Mustang Daily—Evelyn True

The Mustangs offense will look to the air more as they try to keep a grasp on their win streak.

Cal Poly offense makes a pass

From page 10

the starting quarterback spot in the his coach's position. He has completed 54 percent of his passes (32 of 59) for 447 yards and three touchdowns (both tops in the Western Football Conference) in the two Mustang victories, including last week's 21-9 win over Chico State. The engineering technology major has provided the steady play sorely missed during last year's early-season game of musical quarterbacks.

His corps of receivers is also steady. The trio of senior split end Jeff Smith, tight end Damone Johnson and wide receiver Clarence Martin have averaged nearly 16 yards per catch. The consistent Smith, a transfer from the defunct Cal Poly Pomona program, heads the group—and the WFC—with 210 yards on 12 catches. Johnson is an All-America candidate and speedster Martin is always a deep threat.

The only chink in the potent passing armory has been the offensive line. Even though the Mustangs emerged 12 point victors over Chico State, the Poly coaching staff was disappointed with the line play.

"Last week was tough (for Snodgrass), but it had a lot to do with protection," Sanderson said. "We're working hard to improve the protection."

The preparation is vital for San Francisco State, a team cut from the same

mold as the first two Poly opponents.

"They're in the same category as Chico and Sacramento State," Sanderson said. "If we play like we're capable of playing, we have a good chance to win. We know we can't play like the Chico State game and expect to win." The Gators figure to give Cal Poly a good barometer of their early season progress.

Defensively, Cal Poly has been doing admirable work, and Sanderson figures it can only get better. The Mustangs have surrendered only 24 points in two games despite the loss of three starters.

Sanderson praised his defensive unit, saying "we improved greatly between the first and second game. We feel our defensive personnel are some of the best we've had here."

The poly offense has contributed to the defensive success. The Mustangs haven't turned the ball over inside their own territory, forcing opponents into long marches and, consequently, fewer points.

The Chico State game marked the end of Brian Gutierrez' consecutive 100-yard rushing streak at eight straight, as he could muster only 82 yards. Gutierrez, the driving force behind the Mustang ground attack, is still averaging 106 yards per game over the first two contests. Sanderson and Poly hope a new streak starts at San Francisco.

FOCUS ON PMI IN YOUR CAREER

WE'LL BE ON CAMPUS
OCTOBER 4, 5

Precision Monolithics, Inc. is a leader in the design, manufacture and sale of linear integrated circuits. Over the past decade we have positioned ourselves in a niche resulting in continued growth in the semiconductor marketplace. Now in our second decade, we have emerged as a pioneer in precision integrated circuits and have introduced many industry firsts.

We're proud of our people at PMI. Because of their dedication, productivity, attention to quality and sense of urgency, we have been successful and profitable. Our goal is to continue our leadership position as a product innovator in linear data acquisition, data conversion, and telecommunication integrated circuits. Our projections for growth in the future are phenomenal.

The decisions you make in your career path after graduation require an in-depth analysis of what you have to offer — and what your prospective employer will offer you. The key to a successful business relationship is compatibility of talent and resources.

Located in the hub of high technology on the San Francisco Peninsula, PMI's moderate size and open environment enhance individual needs, desires, goals and career growth. We're offering the following engineering opportunities:

**IC DESIGN
TEST
PRODUCT
PROCESS
RELIABILITY/FAILURE ANALYSIS
PRODUCT MARKETING
SALES/APPLICATIONS**

PMI offers outstanding benefits, competitive salaries and a great atmosphere. If your goals include growing with an exciting company, see us while we're on campus. Or, send your resume or a letter describing your background to College Relations, PMI, 1500 Space Park Drive, Santa Clara, CA 95050. An equal opportunity employer.
